

Project 0
0 pts

Submitting through Narnia

Due: Wednesday, Jan. 21

I. Background

The purpose of this project is to make sure that you are able to log in to the submit system on my server and upload your files. While this project is not for a grade, I will not accept Project 1 from you unless you have successfully submitted Project 0.

II. Instructions

A. Create a file to upload

Create a text file named "hello.txt". In that text file write a brief answer to the question, "Why are three reasons you are taking CMSC 160?" Save the file to disk.

B. Open the submit page

Navigate to <https://narnia.homeunix.com/~robert/submit/>

C. Enter the login information

In the menu on the right select "CMSC 160". Type in the username and password from the sheet I handed out in class. Then click "Submit".

D. Select Project 0

You should now see a list of projects that are due. Click on "Project 0" to bring up the project submission form.

E. Upload the file

Click the "Browse" button and select "hello.txt". Click on the button to submit it. You should be redirected to a web page that confirms that you have successfully uploaded the file. It will also remind you about the number of slip days you have left for the semester.
